

CEO Note: A Series of Messages from our CEO... Jo Major

Webinar Alert!

Passive Sensor Technology Introduction & Opportunities

June 25, 2024, 3pm CET, 9am ET

Join our **exclusive** webinar, hosted with Cisper and timed for our US East Coast and European customers.

Ideal for:

- **Professionals** seeking to understand more about **wireless, battery-free** sensors
- **Decision makers** involved in RFID solutions needing to **understand new capabilities**, and
- Anyone looking to **enhance their knowledge** of advanced **process control technologies**.

Webinar Highlights

- **Expert Insights:** Learn from industry leaders **Leon de Ridder**, Co-Owner of Cisper, and **Neil Mitchell**, Vice President of Sales & Marketing at SensThys.

- **Innovative Solutions:** Discover how passive RFID sensors can enhance process control, from temperature tracking and moisture detection to real-time strain monitoring and concrete maturation.
- **Real-World Applications:** See practical examples of RFID technology in action, including applications in critical infrastructure, smart building materials, and composite cure monitoring.
